1. The applicant's amendment has put the case in condition for allowance in view of the applicant's amendment and remarks.

Claim 7 has been canceled.

Claims 1-6 & 8-15, as amended, are allowable over prior arts of record for the reasons as stated below.

REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance:

The prior arts fail to teach or fairly suggest a method for detecting bit line shorts in a flash memory cell structure. Particularly, the method ***program the even columns of addresses with a first logic state and the odd columns with an inverse, second logic state***, then ***selectively coupling odd local bit lines to odd global bit lines*** and ***selectively coupling even local bit lines to even global bit lines***, and then ***monitoring the output*** of the memory array ***for detecting any local bit line shorts and all global bit lines shorts*** in response to a pattern of detected logic states from those global bit lines.

The clear advantage is a more efficient testing for a wafer design for shorts in both local bit lines and global bit lines can be carried out.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
